Household Vacuum Freeze Dryer

DSD-5

This freeze dryer can be set up with 35 recipes, which is convenient for customers to operate with one click. After many experiments and adjustments, we added fruit & vegetable, meat and liquid recipes to the recipe management to ensure that the final product meets the expected standards; You can also choose to adjust some parameters according to the product to be freeze-dried. Customize recipes to suit your needs.

FEATURES

New upgrade, Wifi control optional

Rotary vane vacuum pump

Oil-free vacuum pump

Introduction

Vacuum freeze drying is the removal of water or other solvents from the frozen samples. During the whole drying process, the sample is in liquid state and the temperature is generally lower than -1 °C. The purpose of vacuum freeze drying is to restore the original characteristics of the sample after rehydration.

Because the drying process is carried out at low temperature, it can be used for some materials such as proteins, which are easy to be denatured at high temperature, and can ensure that the properties of other compounds will not change.

Most of the biological products, such as tissues, tissue extracts, bacteria, vaccines and serum, were changed into dry samples by vacuum freeze-drying. Vacuum freeze drying is the most gentle process to preserve the biochemical properties of sensitive tissue or other tissues. It is also the best method for drying inorganic materials, such as nan particles, because the surface area of particles is almost unchanged.

Characteristics

Different size, suitable for home use.

The cold trap is made of stainless steel, which is corrosion-resistant and easy to clean.

With automatic fast defrosting function to improve efficiency.

35 kinds of custom recipes can be set.

The number of pallet layers can be customized.

New upgrade, WiFi control optional.

Model	DSD-5
Freeze-dried area	0.5m ²
Power	1500W
Ultimate vacuum	5pa
Cold trap temperature	-55°C
Processing capacity(kg)	5-7
Material trays	5
Tray size(mm)	200X420X25
Space between partitions(mm)	35
Dimensions(mm)	550X500X800
Packing size(mm)	800X630X1290
Fresh food per batch	4.5-7.0 kg (10-15lbs)
Tray area	0.4 m ² (620sq in)
Tray qty	5pcs
G.W/N.W	125kg/95kg
